Array Networks Recognized by Gartner in 2015 Magic Quadrant for WAN Optimization

Milpitas, CA – March 31, 2015 - Array Networks Inc., a worldwide provider of application delivery networking solutions, has been recognized in Gartner's Magic Quadrant for WAN Optimization. Array's inclusion for 2015 reflects its completeness of vision and ability to execute.

The aCelera WAN optimization controller speeds data transfers and reduces application response times over wide area networks by reducing the amount of traffic transmitted between remote offices, remote users, data centers and clouds. It completes Array's existing solutions in application delivery controllers and secure access gateways, enabling customers to solve application delivery networking challenges at a fair price point.

aCelera has distinguished itself by its availability as a physical appliance from 10Mbps to 1Gbps throughput, as well as its software-based WAN optimization capabilities that support functionality such as compression, deduplication, HTTP, TCP, Common Intern File System (CIFS), Messaging APO (MAPI), Citrix Independent Computing Architecture (ICA), traffic shaping and quality of service (QoS). In addition, aCelera is available as a hardware or a virtual appliance for VMware ESX/ESXi, Microsoft Hyper-V, Citrix XenServer and Windows Server 2008 R2, addressing the demands of the growing types of application deployments.

"Array has worked to give customers a wide variety of solutions that assist in solving application delivery networking challenges," said Michael Zhao, President and CEO of Array Networks. "We are very excited to see that our successful vision and ability to execute are reflected in the latest Gartner Magic Quadrant and are committed to further improvement based upon meeting and exceeding customer expectations."

About Array Networks
Array Networks is a global leader in application delivery networking with over 5,000 worldwide customer deployments. Powered by award-winning SpeedCore software, Array solutions are recognized by leading enterprise, service provider and public sector organizations for unmatched performance and total value of ownership. Array is headquartered in Silicon Valley, is backed by over 300 employees

worldwide and is a profitable company with strong investors, management and revenue growth. Poised to capitalize on explosive growth in the areas of mobile and cloud computing, analysts and thought leaders including Deloitte, IDC and Frost & Sullivan have recognized Array Networks for its technical innovation, operational excellence and market opportunity.
